

INTELIO 2.0

THE TIMELESS DESIGN

The elegant way of expressing your own style.

INTELIO 2.0

Handle and decorative feature in black (RAL 9005)

Handle and decorative feature in stainless steel

The original Intelio model is part of the "Inoxa" range of panels, characterized by high-quality stainless steel ornaments. In the PUR design series, the stainless steel is complemented by finely powder-coated black. The decorative frame around the glass insert fully unfolds its effect in combination with wooden looks.
