

THE ECODORA RANGE

The elegant way of expressing your own style.

OVERVIEW OF MODELS

The front door is the first impression you get of a house and its residents. It welcomes visitors, and gives your home individuality and personal style. Numerous designs, colours, different handles and glazings offer a wide range of options to create a front door to your preferences. It is very simple: Show your individual style with your individual front door.

Do not wait any longer: Use our configurator to create your desired front door on your iPad or PC. See what it would look like on your façade. Our front door configurator provides you with perfect first impressions of your future entrance area.

Kindest regards

Well-protected day and night,
so that our beautiful dreams stay with us.

If you should require additional burglary protection, we recommend you to opt for a front door panel with a certified resistance class RC2. This class includes safety glass and makes you feel safe and secure.

The standard closed double-sided attachment panels we offer already include resistance class RC2. This resistance class has been certified by the renowned German testing institute EPH, and also applies to glazed front door panels with an optionally available security glazing.

SECURITY

P4A security glazing*
– The option

Enjoy the fascination of sandblasted glass. Door panels of the Ecodora range with glazed inserts create hallways flooded with natural light and brightness.

Sandblastings provide for transparency and make rooms appear larger. Refractions of light and transparent inserts create appealing facets and a perfect setting for your door. At the same time, the general appearance stands out for its elegant look and subtle, harmonious design.

GENERAL INFORMATION AND CARE

Thanks to its composition, stainless steel does not rust simply through contact with oxygen. Nevertheless, a rust film may form on the surface due to environmental conditions (air containing salt or iodine), contact with ferrous materials or other soiling agents. To protect the surface from soiling, we recommend regular cleaning of the stainless steel surfaces using a suitable standard cleaning agent. For reproduction and printing reasons, the representation of colours and stainless steel inlays of front door panels as well as handles is not binding.

For a perfect colour-coordination, we recommend using original RAL charts or adeco colour samples. The effects created by glazings and colours also depend on the actual lighting conditions, the time of day, the season and the place of installation.

The outer appearance of the front door changes if the size of the individual door deviates from the size of the front door shown in the catalogue. For more information, please ask your specialised dealer. Technical modifications reserved.

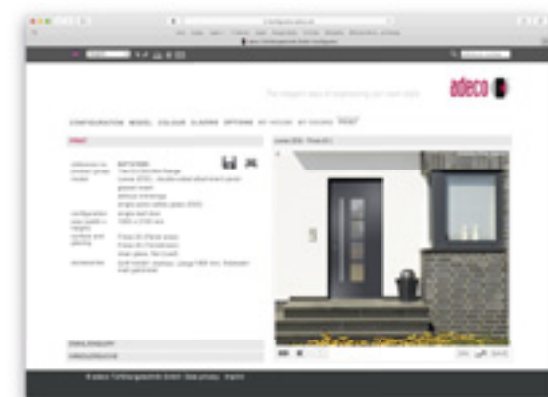

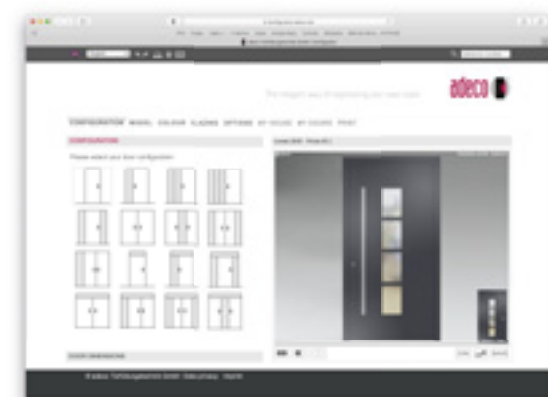

THE CONFIGURATOR

Have you found the front door of your dreams? Wonderful. Now you would like to see how this model blends in with your home – no problem. Please visit our website www.adeco.de. By just one click, you can access our front door configurator.

In just a few minutes, you can create a true-to-detail view of your entrance area. You do not have to have special IT skills – the configurator is very easy to use and, step by step, leads you through the process, without the need of typing in any personal data. Create numerous designs and make your personal choice, conveniently from home.

- Step 1** Select a structural form.
- Step 2** Enter the size of your door.
- Step 3** Select the desired model /variant.
- Step 4** Select surfaces, colour and glazing.
- Step 5** Upload a photo of your entry area or façade. Fit the door into the corner points by just four clicks. If you do not have a digital photo of your house, choose a similar façade from the examples provided.
- Step 6** If you would like to remember a specific configuration, save it under "MY DOORS". You can create and save as many configurations as you like, selecting different forms, models, colours and glazings. You can click through your favourite doors any time, and fit them into your house.
- Step 7** Make a print-out of your favourites using "PRINT" and take it to your specialised dealer for further assistance.

Please get in touch with your specialised dealer if you should have any question about how to operate the adeco-front door configurator.
